hydrate

elevate your hydration

WHAT IS IT?

Activities we do every day can deplete our body's supply of water. Drinking beverages with alcohol, sugar, or caffeine, and even daily exercise take a toll on your level of hydration. Even mild dehydration can cause fatigue, decreased cognitive function, and put you at greater risk for headaches and migraines.

WHAT DOES IT DO?

Hydrate makes it easy and tasty to keep yourself hydrated! Potassium salt replenishes your body's water stores, and antioxidants CoQ10 and Resveratrol help fight oxidative stress all over the body.

KEY INGREDIENTS	FUNCTION
coQ10	A natural coenzyme synthesized in the body. Some research shows that Coenzyme Q10 can assist the body in handling fatigue and support the body's fight with cellular oxidative stress.
resveratrol	A phenol found in blueberries and grapes. Resveratrol may be able to help maintain healthy blood pressure levels and support the body's protection of brain cells from age-related decline.
great salt lake minerals	Replenish your body the natural way, with nutrients from the biggest saltwater lake on the continent! This blend of over 75 different minerals includes magnesium, potassium, iron, and calcium.
vitamin C	An essential vitamin and antioxidant. A well-studied nutrient, evidence shows that Vitamin C has the ability to support white blood cell function and improve your body's absorption of iron.
rapidCT	The exclusive BioReigns biotechnology that protects and delivers each nutrient quickly, efficiently, and directly to your cells through water absorption.
